Projects: New website for the NGO, CDN caching on AWS & real-time social experiment
Tech stack: PHP, Wordpress, JS, React / Flux, jQuery, Handlebars, Gulp, SCSS, MongoDB, AWS etc.

Hublo • Full-stack developer – San Jose, California, USA

ju-sept. 2014

French startup that built a tool to allow non-technical clients to track everything on their website. We joined french incubator's NUMA, then YCombinator's S14 batch.

Projects: Various R&D projects, Hublo's main product & its iterations over time
Tech stack: NodeJS, SailsJS, MongoDB, Ruby, Ruby on Rails, JS, AngularJS, jQuery, AWS, Git etc.

AZNetwork • Developer – Alençon, France

ju-au. 2013

General IT services, software engineering & cloud computing corp. for SMBs.

Projects: New website for its coworking space, as well as clients' website updates
Tech stack: PHP, Wordpress, Drupal, JS, jQuery, CSS etc.

Latest projects_

Find Eat Out • CEO

Final year student project to create a fully viable business plan with its MVP, along with 4 team mates. During 6 months, some Angels, serial-entrepreneurs and specialists helped us think, grow, iterate and build our product. At the end, we pitched in front of experts during a demo day.

Tech stack: NodeJS, SailsJS, Waterline ORM, MongoDB, Heroku pipelines, AWS S3, Gulp, SCSS etc.

Advision • CTO

Startup week's student project to create a fully viable business plan with its MVP. We built tool over Google Adwords to automatically generate ad-groups & ad-group-ads according to a customer's product index. Therefore, we also built a Prestashop plugin to export the products as JSON and import them back in our ad dashboard.

Tech stack: NodeJS, ExpressJS, MongoDB, AngularJS, Gulp, SCSS etc.

Extensio • Co-founder

Side-project to create one of the first NodeJS-based CMS, built over SailsJS. Along with 3 other co-founders, we conceptualized and built an alpha version. A year later, I left the project due to a lack of shared vision. The project has recently been renamed Strapi.io.

Tech stack: NodeJS, SailsJS, Waterline ORM, MongoDB, Heroku etc.

Philosophy_

" *Every morning you have two choices: continue to sleep with your dreams or wake up and chase them.*

Tech stack: C, Java, Assembly, VBA, PHP, SQL, JS PL/SQL, TCP/IP, HTML & CSS

Miscellaneous_

How I enjoy spending a typical day.

Preparing some tea
Meditating
Working
Exercising
Eating fresh food
Technology watch
Museum
Reading & writing

Interests_

When I'm not working, I love watching old art-house movies, visiting museums, going out for a walk, hanging out with some friends, watching conferences, attending TED talks or Meetups, reading Medium articles, playing the ukulele, practicing baseball, running or meditating.

I also support environment protection actions, fighting for peace, human rights, gender equalites & LGBT.
